mITSM is an officially accredited training organization.

Goals and Benefits

ITIL 4 Foundation training teaches participants about IT Service Management as a complete operating model for the creation, delivery, and continuous improvement of tech-enabled products and services.

- How does ITIL 4 succeed in creating shared value with customers and other stakeholders in the form of products and services?
- What are the guiding principles of ITIL 4? What are the four dimensions of service management?
- What are the key concepts from Lean, Agile and DevOps? And why are they important for creating business value?
- How can the practices described in ITIL be integrated into the various areas of service management and IT, from demand to value?

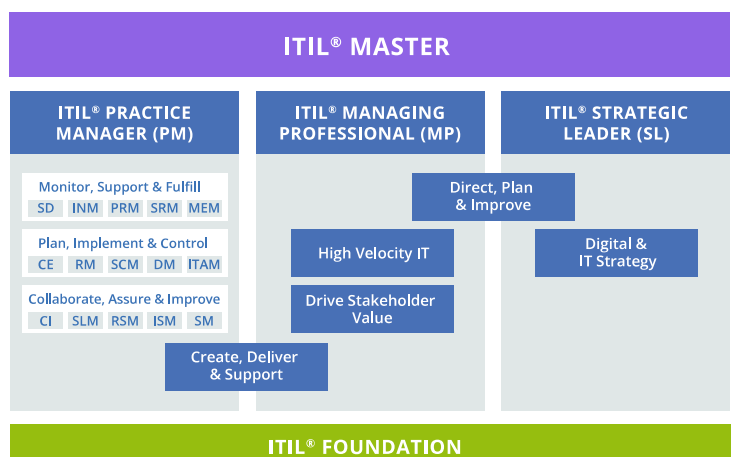

Target Group

- IT Staff
- Diverse professionals in organizations where IT is part of the business model
